

WOYKE

i am, we are.

WEB DESIGNER BRIEF

Configurator UX Architecture & Customisation Specification

Version 1.0 — 2026

■ SUSTAINABLE	■ PERSONALISED	■ ACCESSIBLE
Lab-harvested stones. Zero mining. Fully traceable.	Your design. Your choices. Guided by our craft.	Accessible to all meaningful occasions.

Table of Contents

A. Brand Overview & Positioning

- Brand story, identity, name meaning, tagline philosophy, brand character, tone of voice, colour palette, typography

B. Visual & UX Design Direction

- Aesthetic, layout principles, mobile-first, animations

C. Website Page Structure

- Landing page, occasion selector, configurator, summary, sustainability page

D. The Configurator — Full Step Specification

- Step 1: Occasion
- Step 2: Jewellery Category
- Step 3: Interchangeability
- Step 4: Main Stone
- Step 5: Side Stones
- Step 6: Metal Type
- Step 7: Metal Colour
- Steps 8a–8i: Category-Specific Design Options

E. Category-Specific Steps (8a–8i)

- 8a: Ring
- 8b: Stud Earring
- 8c: Dangling Earring
- 8d: Pendant
- 8e: Necklace
- 8f: Bracelet
- 8g: Bangle
- 8h: Brooch
- 8i: Anklet

F. Universal Final Steps

- Step 9: Engraving
- Step 10: Sizing
- Step 11: Gift Options

G. Special Features & Smart UX Additions

- Surprise Me, Gift Mode, Pair It, AR try-on, Occasion countdown

H. Tech Stack & Integration Notes

- Framework, animations, payments, CRM, analytics

I. Copy Direction & Voice

- Tone guide, sample copy, sustainability messaging

A. Brand Overview & Positioning

Brand Story

i am, we are.

Every person arrives at a moment that changes them. A first paycheck. A proposal. A graduation. A new chapter chosen, not inherited. A friendship that becomes family. These moments do not announce themselves loudly. They arrive quietly — and then they live inside you forever.

WOYKE was built for those moments.

Not for occasions in the abstract. Not for the idea of jewellery as status. But for the specific, unrepeatable instant when you become someone slightly different from who you were before — and you want something to show for it. Something worn. Something you helped make.

WOYKE is a jewellery maker. We work with precision and patience. We are fun, precise, confident in simplicity, but also arresting in magnificent. You will like our work. We guide each customer toward their own vision — we do not impose ours. We are aware of the world we work in: its materials, its impact, its responsibility. Every stone we set is lab-harvested. Every choice we offer is considered. What we make lasts. What it means, lasts longer.

The Name: WOYKE

Pronounced *woke*. The Y is silent.

WOYKE is built around the word WOKE — framed by the initials of those who started it. But the name belongs to the word, not the people. What matters is what WOKE means to this brand.

WOKE

To be woke is to be awake. To have arrived at a realisation — about yourself, about who you are, about what matters. Not a political statement. A human one. The moment you see clearly. The moment you know. That is the moment WOYKE is made for.

The spelling — W-O-Y-K-E — creates a deliberate pause. People will look at it twice. They will ask how to say it. The answer is the brand in one word: *woke*. That moment of realisation — what the name is, what it means — is the brand experience beginning.

The Tagline: i am, we are.

Four words. A comma between them doing everything.

I am — the individual. The awakening. One person, one occasion, one design shaped entirely by their own choices. This is WOYKE's role: to guide, not to prescribe. To offer precision and care as tools for the customer, not as constraints.

We are — and the piece opens outward. Worn between people. Carried across time. Shared, given, inherited. What begins as a single act of self-knowledge becomes part of something larger — a relationship, a family line, a memory that outlives the moment that made it.

The comma is a breath. A hinge. The exact moment a ring slides onto a finger. That pause between *I* and *we* — that is where WOYKE lives.

The Three Pillars

01 · AWAKE	02 · CONNECTED	03 · CONSCIOUS
Customer-led design. One occasion. One person. No two pieces alike.	Occasion-led. Built for the moments that bind people to each other.	Lab-harvested stones only. Zero mining. Fully traceable. Made with intention.

Brand Character

We are fun, precise, confident in simplicity, but also arresting in magnificent.
You will like our work.

WOYKE is not a catalogue. It is not a luxury house. It is a maker — patient, precise, and guided by the customer's own vision. Our role is to ask the right questions, offer the right options, and produce something that could only ever belong to the person who designed it.

We are...	We are not...
Fun — approachable, warm, for all occasions	Precious, stiff, or self-serious
Precise in craft and patient in making	Rushed, careless, or trend-chasing
Confident in simplicity — less, done well, is enough	Overworked or overwrought
Arresting when the moment calls for magnificence	Timid about going fully, boldly there
A guide to the customer's own vision	Prescriptive or imposing
Sustainability-aware in every decision	Preachy or performative
Accessible to all meaningful occasions	Reserved for the grand or the wealthy

Brand Positioning

WOYKE sits in the space where accessible meets meaningful. Not intimidating luxury. Not mass-produced fashion jewellery. The maker for the person who wants something real, made precisely for them, at a price that does not require a grand occasion to justify.

A first paycheck and an engagement ring sit on the same shelf at WOYKE — both equally worthy of a diamond designed for that person, that moment. The design tool is the equaliser. Every customer begins from the same blank canvas and is guided, with patience and taste, to something entirely their own.

Core Promise: Lab-harvested stones, guided design, worn for a lifetime — because the moments that shape you deserve to be kept.

Tagline: i am, we are.

Pronunciation: WOYKE = woke (silent Y).

Primary Market: Singapore, Malaysia, broader SEA. Fine jewellery buyer, 22–45.

Tone of Voice

WOYKE speaks with the quiet confidence of a maker who knows their craft. Never selling. Never flattering. Guiding. Warm without being effusive. Precise without being cold. The tagline *i am, we are.* sets the register: intimate, present tense, always about the person wearing it.

Instead of...	Say...
Select metal type	Pick your metal
Configure your piece	Design it your way
Proceed to checkout	It's ready — let's go
Diamond specifications	Your diamond, your way
Lab-harvested certified	Grown with intention, never taken from the earth
Select side stone setting	How do you want it held?
Add to cart	This one's yours
Order confirmed	We're making it. Just for you.
Share your design	Show them who you are
Choose your design	Tell us what matters

Our jewellery	What we make together

Colour Palette

Role	Colour	Hex
Background (primary)	Soft off-white	#FAF8F5
Background (warm)	Cream	#F2EDE4
Accent / Gold	Champagne gold	#C9A84C
Secondary accent	Blush	#E8B4A0
Tertiary accent	Sage green	#A8B5A2
Text (primary)	Charcoal	#2C2C2C
Text (secondary)	Mid grey	#6B6B6B
Dark surface / nav	Near-black	#1A1A1A
Optional dark metal	Gunmetal	#4A4A52

Typography

- Display / Headings** — DM Serif Display or Lora — friendly modern serif. Warm, approachable, premium.
- Body / UI** — Plus Jakarta Sans — clean humanist sans. Highly legible at small sizes.
- Engraving Preview** — Cormorant Garamond (script option), Playfair Display (serif option), DM Mono (block option)
- *Never use Inter, Roboto, or Arial — these undermine the premium feel.*

B. Visual & UX Design Direction

Aesthetic Direction

Warm, airy, considered — not cold luxury, not fast fashion. Cream whites, warm champagne, blush pinks, sage greens. Gold is the accent, never the background. Every interaction should feel like the beginning of something made to last.

Layout Principles

- Side-by-side on desktop: configurator steps on the left, live jewellery preview on the right.
- Single-column step-by-step on mobile — one decision per screen, always.
- Progress indicator: a thin gold line at the top of the page tracking step completion.
- Back / undo is always visible — low-commitment, non-destructive.
- Generous white space — breathing room conveys luxury without cost.
- Asymmetric layouts and diagonal flow are encouraged on editorial pages.

Animation & Motion

- Step transitions: smooth horizontal slide (forward) and reverse slide (back).
- Selection feedback: chosen cards lift with a warm gold glow and a subtle scale-up.
- Live preview: when any option changes, the jewellery preview transitions with a soft shimmer — like turning a gem.
- Progress bar fills with a liquid-gold animation.
- Page load: staggered reveal of hero elements (brand name → tagline → CTA).
- Hover states on all interactive cards: slight elevation + gold border.
- Loading states: a rotating diamond wireframe, not a generic spinner.

Mobile-First Requirements

Majority of WOYKE's target audience will design on a smartphone. Every screen must be thumb-friendly. Key considerations:

- Tap targets minimum 44×44px.
- Sticky bottom CTA bar (Next Step / Add to Cart) always visible.
- Swipeable option carousels for stone shapes, chain styles etc.
- Pinch-to-zoom on live jewellery preview.
- Share design button generates a beautiful card image for Instagram/WhatsApp Stories.

Accessibility

- WCAG AA compliant contrast ratios throughout.
- Keyboard-navigable configurator steps.
- ARIA labels on all custom selectors and swatches.
- Alt text on all jewellery preview illustrations.
- Screen-reader friendly step announcements.

C. Website Page Structure

Landing / Hero Page

- Full-screen warm hero — lifestyle image of real person wearing a WOYKE piece, a genuine moment.
- Headline: 'i am, we are.'
- Sub-headline: 'Design your own. Lab-harvested stones. Made entirely yours.'
- Primary CTA: 'Start Designing' — leads directly into the configurator.
- Secondary CTA: 'See How It Works' — scroll-down anchor to a 3-step explainer.
- Sustainability strip below hero: Lab-harvested stones · Ethically made · Free shipping · 30-day returns.

Occasion Inspiration Row

- Horizontally scrollable cards on mobile, 4-column grid on desktop.
- Each card = one occasion (see Step 1 list). Clicking pre-loads a suggested configuration.
- This starts the journey with feeling, not product — meeting the customer where the moment lives.

The Configurator

- The core experience — full specification in Section D & E below.
- Persistent live preview panel (right column desktop / sticky bottom mobile).
- Price counter updates in real time with every selection.

Summary & Checkout Page

- Full design card: warm narrative recap ('Your 1ct oval diamond, set in rose gold...').
- Transparent pricing breakdown (base + stone + metal + extras).
- Lead time: 'Crafted with care in 3–4 weeks — worth the wait.'
- Social proof strip: ★★★★★ '10,000+ pieces designed. Real people, real love.'
- Two CTAs: 'Book a Free Virtual Consultation' and 'Proceed to Checkout'.
- Buy-now-pay-later option visible at checkout (Atome / GrabPay / Pace for SEA).

Sustainability Page

- Simple visual comparison: mined stone vs. lab-harvested stone — CO2, water, land disruption.
- Brand commitment: renewable energy, recyclable packaging, carbon-neutral shipping.
- Linked from nav, footer, and sustainability strip on hero.

My Designs (Account / Saved)

- Last 3 saved configurations shown with thumbnail previews.
- No account required — saved via localStorage as guest, synced on sign-up.
- 'Resume Design', 'Share Design', 'Delete' actions on each saved piece.

D. The Configurator — Steps 1 to 7

The configurator is designed like a friendly quiz, not a technical form. One decision per screen. Large visuals, plain English, obvious choices. Every step has a warm headline and a one-line emotion-led sub-prompt in italics.

STEP 1 — Choose Your Occasion

"Every piece tells a story. What's yours?"

The chosen occasion sets the mood of the entire design session. Suggested combinations, copy tone, and default stone/metal pre-selections adapt based on this choice. Displayed as warm illustrated cards in a 3-column grid (desktop) / 2-column (mobile).

Occasion	Display Copy
■ First Paycheck	Treat yourself. You earned it.
■ Proposal / Engagement	The beginning of forever.
■ Wedding	For the day everything changes.
■ Birthday	Because every year deserves a celebration.
■ Graduation	The next chapter starts here.
■ Anniversary	For the love that keeps growing.
■ New Baby	Welcome to the world, little one.
■ Heartbreak / New Chapter	This one's for you.
■ Self-Gift	No reason needed.
■ Friendship / Besties	Matching pieces, unbreakable bond.
■ Just Because	The best gifts need no occasion.
■ Eid / Festive Gift	For celebrations that shine.
■ Mother's Day	For the woman who holds everything together.
♥■ Valentine's Day	Say it without words.
■ Work Milestone / Promotion	Wear your success.
■ Push Present	Because bringing life into the world deserves diamonds.
■ New Home	A fresh start, beautifully marked.
👋■ Farewell / Moving Away	Carry a piece of home, always.

STEP 2 — Choose Your Jewellery Category

"What would you like to create?"

Category	Display Copy	Routing
■ Ring	Worn every day or saved for the moment.	→ Routes to Step 8a
■ Stud Earring	The quiet classic. Always right.	→ Routes to Step 8b
■ Dangling Earring	Movement, sparkle, drama.	→ Routes to Step 8c
■ Pendant	Close to the heart.	→ Routes to Step 8d
■ Necklace	Layered or solo, it frames everything.	→ Routes to Step 8e
■ Bracelet	On the wrist, always in sight.	→ Routes to Step 8f

■ Bangle	Stack them, or let it stand alone.	→ <i>Routes to Step 8g</i>
■ Brooch	Wear it your way — lapel, scarf, collar.	→ <i>Routes to Step 8h</i>
■ Anklet	Subtle, playful, unexpected.	→ <i>Routes to Step 8i</i>

STEP 3 — Interchangeability (WOYKE Signature Feature)

"One piece. More than one life."

This is WOYKE's hero differentiator — jewellery that transforms. Only valid combinations are shown based on the category selected in Step 2. Each option includes a looping micro-animation demonstrating the transformation.

- None** — This piece is exactly what it is.
- Stud ↔ Dangling Earring** — Detach the drop for a clean stud; reattach for evening. One diamond, two moods.
- Ring ↔ Pendant** — Slip the stone setting off the band onto a chain. From finger to heart in seconds.
- Ring ↔ Brooch** — A statement ring that pins to a jacket lapel or scarf.
- Pendant ↔ Brooch** — Clips to fabric or hangs on a chain — your choice each morning.
- Bracelet ↔ Necklace** — A long bracelet that extends and clasps as a choker or delicate necklace.

STEP 4 — Main Stone

"The heart of your piece."

Shown as large illustrated gem cards with a name and one-line personality descriptor. Each stone has an associated glow colour in the UI (white for diamond, deep red for ruby etc). Selecting a stone unlocks the Shape and Size sub-options below.

- None** — Metal-only design — sculptural, minimalist.
- Diamond** — Classic white. Timeless.
- Blue Diamond** — Rare, cool, quietly electric.
- Pink Diamond** — Soft romance with serious sparkle.
- Ruby** — Deep red passion. Bold and ancient.
- Blue Sapphire** — Royal, deep, enduring.
- Pink Sapphire** — Playful blush with a modern edge.
- Emerald** — Rich green. Dramatic and lush.

4a — Stone Shape (shown as large visual SVG selectors)

- Round Brilliant — Maximum brilliance. The most popular cut.
- Princess — Square, sharp corners. Modern and bold.
- Cushion — Rounded square. Romantic and vintage-inspired.
- Oval — Elongating, romantic. Currently the most requested shape.
- Pear — Teardrop form. Elegant and directional.
- Emerald Cut — Long rectangular facets. Architectural and serene.
- Asscher — Square with cropped corners and step facets. Art Deco.
- Marquise — Elongated pointed oval. Vintage drama.
- Radiant — Rectangular with brilliant facets. Best of both worlds.
- Heart — Unmistakably romantic. For those who commit fully.

4b — Stone Size

Presented as three tiers for casual shoppers, with an advanced toggle for exact specs:

Small — ~0.25–0.50 ct. Delicate, everyday.

Medium — ~0.75–1.0 ct. The sweet spot.

Large — ~1.25 ct+. Statement.

■ *Advanced toggle reveals: exact carat slider, Cut (Good/VG/Ideal/Super Ideal), Colour (D–J), Clarity (IF to SI1), Certificate (IGI / GIA).*

■ *At end of Step 4: 'Would you like to add side stones?' → Yes / No, skip to metal.*

STEP 5 — Side Stone(s)

"A little more sparkle never hurts."

Identical stone options to Step 4. Side stones do not need to match the main stone — mixing is actively encouraged and previewed live. Up to 2 side stones total. At end of Side Stone 1: 'Add a second side stone?' → Yes / No.

■ *Stone shape for side stones: Round / Baguette / Trillion / Princess — narrowed set appropriate for accent/side placement.*

STEP 6 — Metal Type

"The foundation of your piece."

18K Gold — The sweet spot of durability and luxury. Warmer, lighter. Recommended for most pieces.

Platinum 950 — Rarer, denser, naturally hypoallergenic. The purest choice. Ideal for engagement rings.

■ *Tooltip: 'Not sure? Most everyday pieces are 18K. Platinum is ideal for pieces worn constantly.'*

STEP 7 — Metal Colour

"Gold comes in more shades than you think."

Displayed as large circular swatches with name and personality tag. Hovering reveals a lifestyle image of the metal colour in context.

Yellow Gold — Classic, warm, timeless. [#C9884C (swatch)]

White Gold — Cool, modern, versatile. [#E8E8EC (swatch)]

Rose Gold — Romantic, warm, feminine. [#D4936A (swatch)]

Gunmetal — Edgy, modern, unexpected. Grey-toned alloy. 18K only. [#4A4A52 (swatch)]

Black Gold — Bold and dramatic. Rhodium black-plated. 18K only. [#1A1A1A (swatch)]

■ *Note: Gunmetal and Black Gold available on 18K only. Platinum is offered in its natural cool-silver tone.*

E. Category-Specific Design Options — Steps 8a to 8i

The customer routes to the relevant 8x step based on their selection in Step 2. All 8x steps share the same finishing language (polish/satin/hammered etc.) and the same setting vocabulary (claw/bezel/pavé etc.) for consistency.

STEP 8a — Ring

8a-0: Ring Sub-type

"What style of ring are you creating?"

- Solitaire
- Halo
- Three-Stone
- Pavé / Eternity
- Cocktail / Statement
- Stacking Ring
- Signet

8a-1: Band Profile / Shape

Tapered — Wider at setting, narrows toward back. Elegant and flattering.

Straight / Parallel — Even width all around. Clean and architectural.

Wavy — Gentle S-curve undulation. Organic and fluid.

Creeper / Vine — The band climbs and wraps organically, like a tendril.

Crisscross / X-band — Two strands cross at the base creating an X silhouette.

Intertwined / Twisted — Two or more strands twisted together. Represents togetherness.

Split Shank — Band splits into two as it approaches the setting, framing the stone.

Bypass — Two ends sweep past each other without meeting. Sculptural.

Knife Edge — Sharp ridge running along top of band. Graphic and modern.

8a-2: Band Thickness

3mm — Delicate. Ideal for stacking.

4mm — The everyday sweet spot.

5mm — Bold. Makes a statement.

8a-3: Band Surface Finish

High Polish / Shine — Mirror-bright. Classic and glamorous.

Satin / Silk — Soft brushed texture. Modern and understated.

Hammered — Hand-worked irregular dimples. Artisan, organic.

Lined / Engraved Lines — Fine parallel lines etched along the band. Architectural.

Milgrain / Beaded — Tiny bead-like detailing along edges. Vintage-romantic.

Bark / Wood-grain — Irregular texture mimicking natural wood grain. Earthy.

Florentine — Crosshatch engraving for matte patterned texture. Renaissance-inspired.

■ *Can mix inner and outer finish: e.g. high polish outside, satin inside.*

8a-4: Main Stone Setting

Round Claw 4-prong — Four rounded claws. Classic and secure.

Round Claw 6-prong — Six claws for extra security. Rounder silhouette.

Sharp / Pointed Claw — Tapered angular claws. More dramatic and modern.

L-shaped / L-prong — Flat-profile prongs. Sleek and contemporary.

Bezel (Full) — Metal rim wraps the stone completely. Smooth, modern, protective.

Half Bezel — Metal on two sides. Stone exposed on flanks. Elegant hybrid.

Tension — Stone appears to float, held by compression of the band. Striking.

Channel — Stone sits within a channel. Clean and flush.

Flush / Burnish — Stone level with metal surface. Minimal.

Cathedral — Arching metal supports rise from band to elevate the setting. Grand.

8a-5: Side Stone Setting

Pavé — Tiny stones set close together, secured by small metal beads. Maximum sparkle.

Micro-Pavé — Even smaller stones, more precisely set. Diamond-saturated.

Channel — Side stones set flush in a metal channel.

Individual Claw — Each side stone held by its own claws.

Shared Prong / Fishtail — Adjacent stones share a single prong. More stone, less metal.

Bar Setting — Thin vertical metal bars between each stone. Graphic and linear.

Invisible Setting — No visible prongs — stones appear to float in seamless surface.

8a-6: Ring Size

US sizes 3–13 (with UK / EU / Asian equivalents shown). Pop-up visual ring sizer guide. Option to order a free sizer kit.

STEP 8b — Stud Earring

8b-1: Stone Setting / Front Design

Round Claw 4-prong — The everyday classic.

Round Claw 6-prong — A touch more drama and security.

Sharp / Pointed Claw — Edgy and angular.

L-prong / L-shaped — Flat-profile. Sleek and contemporary.

Bezel (Full) — Clean modern rim. Protective.

Half Bezel — Open on two sides. Hybrid of protection and sparkle.

Halo — Ring of smaller stones surrounds main stone. Maximum glamour.

Wrapped — Metal appears to twist organically around the stone.

Milgrain Halo — Ring of tiny metal beads frames the stone. Vintage-romantic.

Starburst / Sunburst — Metal rays extend from the stone like a star.

8b-2: Backing / Clutch Design

The back is visible when hair is worn up — it's a design surface, not an afterthought.

Oriental / Scroll — Classic curved scroll back. Traditional.

Floral — A small decorative flower motif. Pretty detail when hair is up.

Star — A five-point star clutch back.

Geometric / Hexagon — Flat geometric shape. Modern.

Butterfly (standard) — Universal, secure, everyday.

Screw-back — Threaded post for maximum security. For precious stones.

Locking / Push-back — Clicks into place. Ideal for active wear.

8b-3: Backing Size

S — Barely there. Minimalist.

M — The everyday standard.

L — More visible. More decorative.

STEP 8c — Dangling Earring

8c-1: Drop Style / Length

Drop — Short elegant downward extension. Subtle movement, close to lobe.

Short Dangle (2–3cm) — Visible swing without going long. Versatile day to evening.

Long Dangle (4cm+) — Full movement, maximum drama. Made for evenings.

Ear Crawler / Climber — Curves upward along the ear. Architectural and modern.

Chandelier — Multiple tiers of stones cascading downward. Showstopping.

Threader — Fine chain threads through the piercing. Ultra-minimal.

8c-2: Main Stone Setting

Same options as 8a-4: Round claw, sharp claw, L-prong, bezel, half bezel, tension, flush, cathedral.

8c-3: Side Stone Setting

Same options as 8a-5: Pavé, micro-pavé, channel, shared prong, bar, claw, invisible.

8c-4: Connection / Link Style

Simple Hook (Shepherd's Hook) — Plain curved wire. Effortless and classic.

Leverback — Hinged closure that locks. Secure and refined.

Stud-top with Drop — Set stone at top (post) with chain or drop below. Two pieces in one.

Hoop with Drop — Small hoop at top with pendant drop hanging from it.

Chain Link — Dangle suspended on a delicate chain link from the post top.

STEP 8d — Pendant

8d-1: Pendant Silhouette

Solitaire — A single stone, simply elevated. The stone is the entire story.

Halo — Centre stone encircled by ring of smaller stones. More sparkle.

Drop / Teardrop — Elongated form tapering to a point. Elegant on the neckline.

Cluster — Multiple stones arranged as one unified shape — a constellation.

Geometric — Circle, hexagon, triangle, bar, or square in clean metal lines.

Nature-Inspired — Leaf, petal, crescent moon, star, snowflake.

Symbolic / Meaningful — Infinity loop, cross, initial letter, heart, knot.

Locket — Hinged pendant that opens to hold a photo or engraved message inside.

8d-2: Main Stone Setting

Same options as 8a-4 (round claw, sharp claw, L-prong, bezel, half bezel, tension, flush, cathedral).

8d-3: Side Stone Setting

Same options as 8a-5 (pavé, micro-pavé, channel, shared prong, bar, claw, invisible).

8d-4: Bail Style

The bail is the loop at the top of the pendant connecting it to the chain.

Simple Round Bail — Plain loop. Clean, classic, unobtrusive.

Decorated Bail — Set with small stones or engraved. Visible design detail.

Split / Double Bail — Two parallel loops — pendant sits flat and stable on the chain.

V-Bail — V-shaped pinch bail. Graphic and modern.

Hidden Bail — Flush into the pendant design — appears to float on the chain.

Swivel Bail — Rotates 360° — pendant always faces forward regardless of movement.

Figural Bail — Shaped as part of the design — a petal, branch, or ribbon.

8d-5: Chain Style

Cable — Simple oval interlocking links. Delicate and timeless.

Curb — Flat uniform twisted links. Slightly bolder than cable.

Rope — Tightly twisted strands that spiral and shimmer.

Box — Square links. Sturdy, modern, geometric.

Singapore / Twisted — Fine links twisted to create a fluid ripple. Catches light beautifully.

Belcher / Rolo — Wide D-shaped links. Chunky, gender-neutral.

Trace — Ultra-fine oval links. Barely-there. Ideal for layering.

Snake — Smooth flexible coil. Sleek and architectural.

8d-6: Chain Length

40cm (choker) · 45cm (collarbone) · 50cm (below collarbone) · 55cm (mid-chest) · 60cm (long drop)

■ Neck diagram showing drop position at each length included on screen.

8d-7: Adjustable Length?

Fixed — Exactly as chosen.

Adjustable ±5cm — Small sliding adjuster or two ring stops. Versatile for layering.

STEP 8e — Necklace

A necklace without a pendant — the design is the chain itself, possibly stone-set along its full length.

8e-1: Necklace Style / Structure

Tennis Necklace — Continuous line of identical stones all the way around. Unbroken glamour.

Station Necklace — Individual stones at intervals along a delicate chain. Effortless and modern.

Graduated Necklace — Stones increase in size toward the centre symmetrically. Formal, timeless.

Collar / Choker — Sits snugly at base of throat. Can be rigid or flexible.

Lariat / Y-Necklace — Long chain that drops into a Y-shape at the front. Modern, adjustable.

Bib Necklace — Multiple rows of stones fan across the décolletage. Show-stopping.

Layering Chain — Fine standalone chain designed to be worn with other necklaces.

Opera / Long Chain — 70–90cm. Worn long, doubled, or knotted. Versatile and dramatic.

8e-2: Chain Style

Same options as 8d-5 (cable, curb, rope, box, Singapore, belcher, trace, snake).

8e-3: Stone Placement Along Chain

Evenly spaced, uniform size — Clean and consistent.

Graduated (larger in centre) — Draws the eye inward. Formal and flattering.

Asymmetric placement — Stones clustered on one side. Editorial.

Front-only (bottom third) — Stones on front portion only; back is plain chain.

8e-4: Setting Style Along Chain

Individual claw, bezel, pavé, channel, bar — all adapted for horizontal stone placement along a chain.

8e-5: Clasp Style

Lobster Clasp — Everyday standard. Reliable, unobtrusive.

Spring Ring — Compact and delicate. Suits fine chains.

Box Clasp — Clicks shut. Preferred for tennis necklaces. Flat and secure.

Toggle Clasp — T-bar through a ring. Decorative — the clasp becomes a design feature.

Magnetic Clasp — Snaps together. Easy for those who struggle with fine clasps.

Infinity / Slide Lock — Figure-8 loop. Minimal and seamless-looking.

Lobster with Extender — Extender chain allows multiple wearing lengths.

8e-6: Chain Length

40 / 45 / 50 / 55 / 60 / 70 / 80cm — neckline diagram showing drop at each length.

STEP 8f — Bracelet

8f-1: Bracelet Style

Tennis Bracelet — Continuous line of identical stones on a flexible band. The classic.

Station Bracelet — Individual stones along a delicate chain with visible chain between.

Chain Bracelet — Pure metal chain — the links are the design. Stack anchor.

Charm Bracelet — Chain with 3 starter charm positions; additional charms sold separately.

Cuff Bracelet — Rigid open-ended arc. Bold and structural.

Link Bracelet — Wide flat interlocking plates. More surface area, more statement.

Bar Bracelet — Horizontal ID-style bar on a fine chain. Engraving is the focus.

8f-2: Chain / Link Style

Curb / Cuban — Flat interlocked twisted links. Bold and structured.

Figaro — Alternating short and long links. Italian, rhythmic.

Rope — Twisted spiral links. Textured, sparkles from all angles.

Paperclip / Rectangle Link — Long flat open rectangular links. Currently fashion-forward.

Snake — Smooth coiled fluid metal. Sleek and tactile.

Box — Square links in a continuous geometric line.

Trace / Cable — Simple round or oval links. Delicate and fine.

8f-3: Stone Setting Along Band

4-prong claw, bezel per stone, channel-set row, pavé surface, shared prong (fishtail).

8f-4: Clasp Style

Lobster, spring ring, box clasp, toggle, magnetic, slide lock. Box clasp recommended for tennis bracelets; toggle is the most decorative option.

8f-5: Safety Feature

None — For lighter everyday pieces.

Safety chain — Secondary fine chain catches bracelet if clasp opens accidentally.

Safety catch / Double lock — Additional fold-over latch on clasp. Standard for fine tennis bracelets.

Box clasp with double tongue — Two tongues must both be pressed to release. Most secure option.

8f-6: Bracelet Length

14cm · 15cm · 16cm · 17cm · 18cm · 19cm · 20cm

■ *Wrist measuring guide pop-up. Default note: 'Most women wear 16–17cm; add 1cm for a relaxed fit'.*

STEP 8g — Bangle

A bangle is rigid — it slides over the hand onto the wrist. All design choices reflect this structural distinction from a bracelet.

8g-1: Bangle Structure / Opening

Full Round / Slip-on — Complete unbroken circle. Slides over the hand. Most traditional.

Hinged — Opens with a hinge and snap clasp. Easier to put on. Good for larger hands.

Hinged with Safety Lock — As above, with additional fold-over safety clasp.

C-shaped / Open Cuff — Rigid arc without a full closure. Pressed onto wrist. Adjustable.

Spiral / Coil — Metal spiral wrapping the wrist 1.5–3 coils. Sculptural.

Stacking Set (2 or 3) — Designed together — each slightly different. Sold as a curated stack.

8g-2: Bangle Profile / Cross-section

Round — Simple wire or tube. Light and comfortable.

D-shaped / Flat inside — Flat against wrist, rounded outside. Comfortable for all-day wear.

Knife Edge — Sharp ridge on outer edge. Graphic and modern.

Square — Squared-off profile. Architectural and angular.

Flat / Ribbon — Wide thin flat band. More surface area for detail.

8g-3: Width

2mm — Thread-fine. Delicate. Meant to stack.

4mm — Slim. Everyday sweet spot.

6mm — Medium. Works alone or as stack anchor.

8mm — Bold. Enough surface for detail.

10mm+ — Cuff-width. Architectural.

8g-4: Surface Design / Finish

Plain / High Polish — Mirror-bright. Timeless.

Brushed / Satin — Directional texture, soft luminosity.

Hammered — Hand-worked irregular dimples. Artisan.

Engraved Pattern — Repeated motif: chevron, botanical, geometric, wave, or custom.

Milgrain / Beaded Edge — Tiny bead trim along both edges.

Fully Pavé-Set — Entire outer surface encrusted with diamonds or coloured stones.

Partial Stone Band — Top quarter or half set with stones; rest is plain metal.

8g-5: Stone Setting (if stones selected)

Pavé, micro-pavé, channel, individual claw, bezel, bar. Placement choice: full circumference / top half / front section only.

STEP 8h — Brooch

The brooch is WOYKE's most creative category — wearable sculpture. It lives at the intersection of jewellery and fashion accessory.

8h-1: Brooch Silhouette / Form

Floral / Corsage — Single flower or spray. Petals, stems, leaves. Naturalistic or stylised.

Starburst / Sunburst — Radiating rays from a central stone. Bold and graphic.

Bar Brooch — Horizontal elongated bar with central motif. Clean, easy to wear on a lapel.

Crescent Moon — Curved arc set with stones. Celestial, romantic.

Bow / Ribbon — Looped bow silhouette. Feminine and classic; can be pavé-encrusted.

Geometric / Abstract — Triangle, circle, arc, interlocking rings, or free-form sculptural shape.

Animal / Figural — Bird, butterfly, dragonfly, or other nature-inspired motif.

Cluster / Bouquet — Multiple stones densely arranged — pure light, no visible form.

Circular / Disc — Flat or domed circular form. Like a coin of diamonds and gold.

Letter / Initial — Customer's initial in pavé or plain gold. Highly personal.

8h-2: Stone Setting

Individual claw, bezel, pavé, micro-pavé, channel, invisible setting. The brooch surface can be fully or partially stone-set.

8h-3: Dimensionality

Flat / Two-dimensional — Lies flush against fabric. Graphic, minimal.

Low-relief — Slight depth and dimension. More interesting in person.

High-relief / Three-dimensional — Fully sculpted — petals that truly look like petals.

Articulated / Moving parts (en tremblant) — Elements that tremble and move. Precious and theatrical.

8h-4: Pin Backing Style

Standard Pin + Catch — Classic single pin with roll-over safety catch. Universal.

Double Pin — Two pins side by side — keeps brooch from rotating on fabric.

Locking C-catch — Pin folds into locking clasp. More secure than roll catch.

Trombone / Box Pin — Pin slides into box catch and locks. Most secure — for heavy pieces.

Clip-back (no pin) — Hinged clip grips fabric without piercing. For thick fabrics, hats.

Dual: Pin + Clip — Can be worn as pin OR clip depending on fabric. Maximum versatility.

8h-5: Convertibility (ties back to Step 3)

Brooch only — A dedicated brooch.

Add a bail loop — Discreet loop soldered to back — hang on a chain as pendant when not pinned.

Add chain connectors — Loops at both sides — two brooches connected by chain across the chest.

8h-6: Brooch Size

Small (2–3cm) — Subtle. Ideal for collar or shirt lapel.

Medium (3–5cm) — Versatile everyday. Works on jackets, blazers, scarves.

Large (5–8cm) — A statement. Focal point of an outfit on a coat or evening dress.

STEP 8i — Anklet

The anklet is WOYKE's most playful, personal category — delicate and intimate. Seen only when the wearer chooses to show it.

8i-1: Anklet Style

Delicate Chain Anklet — A fine chain that sits at the ankle. Barely there, permanently beautiful.

Station Anklet — Individual stones along a fine chain. Subtle sparkle with every step.

Tennis Anklet — Continuous line of stones all around the ankle.

Charm Anklet — Fine chain with 1–3 small charms at intervals. Playful and personal.

Layered / Multi-strand — Two or three parallel chains connected at the clasp as one piece.

Cuff Anklet — Rigid or semi-rigid arc around the ankle bone. Architectural.

Body Chain Anklet — Anklet with extension chain running up the foot to a toe ring.

8i-2: Chain Style

Cable, trace, curb, rope, box, Singapore, snake. Trace and cable recommended — most complementary to the ankle's delicacy. Pavé and bezel settings preferred — no raised prongs to catch on hosiery.

8i-3: Charm Options (if Charm Anklet)

Up to 3 charms from: Star · Crescent Moon · Heart · Key · Infinity · Wave · Flower · Butterfly · Four-leaf clover · Diamond solitaire drop · Initial letter · Coordinates charm (custom lat/long engraved)

8i-4: Clasp Style

Lobster with Extender — Standard choice. 3–5cm extender for sizing flexibility.

Spring Ring — Compact and delicate. For very fine chains.

Toggle Clasp — Decorative T-bar. The clasp is a visible design detail at the ankle.

Magnetic Clasp — Easy to fasten — useful for ankle position which is hard to reach.

8i-5: Ankle Size

22cm · 23cm · 24cm · 25cm · 26cm · 27cm

■ *Ankle measuring guide pop-up. Note: 'Most women wear 23–25cm; add 1–2cm for a relaxed drape'.*

8i-6: Toe Ring Add-on (optional)

Surfaces when Body Chain Anklet is selected, or as an add-on for any anklet. Simple matching open band in same metal, adjustable to fit any toe.

F. Universal Final Steps (All Categories)

STEP 9 — Personal Engraving (Optional)

"Make it say something only you would say."

Text input: max 30 characters. Live preview renders the chosen font on the piece.

Script (Cursive) — Flowing and romantic. Best for names and short phrases.

Classic Serif — Elegant and formal. Timeless.

Modern Block — Clean and bold. Contemporary.

■ Placement: inner band of rings; reverse face of earrings/pendants/brooches; inside clasp bar of bracelets/bangles.

STEP 10 — Sizing

Category-appropriate sizing selection:

Category	Sizing Method	Guide
Ring	US size 3–13	Pop-up visual ring sizer + free sizer kit option
Bracelet	14–20cm	Wrist measuring guide. Add 1cm for relaxed fit
Bangle	Internal diameter 58–68mm	Hand circumference guide
Necklace / Pendant	40/45/50/55/60/70/80cm	Neck diagram showing drop position
Anklet	22–27cm	Ankle circumference guide. Add 1–2cm for drape
Stud Earring	No sizing — backing size selected in 8b-3—	
Dangling Earring	No sizing needed	—
Brooch	Size selected in 8h-6	—

STEP 11 — Gift Options (Toggle: 'Is this a gift?')

Gift message — Handwritten card, 150 character limit. Customer writes it during checkout.

WOYKE gift box (complimentary) — Signature cream and champagne gold, ribbon-tied. Always included.

Hide price from packaging — Toggle — removes all pricing from paperwork inside the box.

Premium gift wrap upgrade — Silk pouch + wax seal + hand-tied gold ribbon. Optional add-on.

Virtual gift card — Send a digital gift card with a custom message for the recipient to design their own piece.

G. Special Features & Smart UX Additions

■ Surprise Me Button

Randomly generates a beautiful, coherent combination. Respects previous selections (e.g. if category = ring, it only randomises ring-specific options). Great for indecisive shoppers and impulse moments. Animated 'spinning gem' while generating.

■ Design History

Last 3 saved designs shown in a sidebar panel. 'Come back to these anytime.' Saved without account creation via localStorage; synced on sign-up.

■ Gift Mode

Activated by toggle at Step 11. Hides price from shareable link. Adds complimentary gift note card + wrap option. Shareable URL generates a beautiful design-reveal card for Instagram/WhatsApp.

■ Pair It

After completing a piece, system suggests a matching companion in the same metal and style. E.g. after designing a ring → 'Complete the set: matching studs in rose gold pavé.' Displayed as a warm suggestion card before checkout, never as a pushy upsell.

■ Digital Certificate Preview

After stone selection, a mock IGI/GIA-style certificate is shown for the chosen spec. Educational and trust-building. Real certificate ships with the piece.

■ Occasion Countdown

'Need it by Valentine's Day? Order by Feb 1 for guaranteed delivery.' Dynamic countdown banner in the configurator and on the hero page for key dates (Valentine's, Christmas, Eid, Mother's Day, 11.11). Auto-updates based on calendar.

■ AR Try-On

For rings and earrings — uses device camera to preview the piece on the user's hand/ear. WebAR integration (e.g. 8th Wall or Snap Camera Kit). MVP: hand try-on for rings. Phase 2: earring try-on.

■ Share Your Design

Generates a beautiful branded design card (portrait format, 9:16 for Stories) showing the jewellery illustration, all specifications, and 'Designed on WOYKE'. One-tap share to Instagram, WhatsApp, or copy link.

■ Back-in-Stock / Ready-to-Ship Notifications

Some configurations are pre-made and available for faster shipping. If a customer's exact config is in stock: 'Ships in 3–5 days — want to skip the wait?' Toggle between custom-crafted (3–4 weeks) and ready-to-ship.

■ Redesign Your Old Piece

'Have an old piece you love? Tell us about it and we'll help you redesign it with a lab-harvested stone.' A form that captures current piece details and desired changes — routes to consultation.

H. Tech Stack & Integration Notes

Layer	Recommended Tool	Notes
Framework	Next.js 14+ (App Router)	SSR for SEO; ISR for product pages
Styling	Tailwind CSS + CSS custom properties	Design tokens for brand colours/fonts
Animation	Framer Motion	Step transitions, hover states, preview shimmer
State Management	Zustand	Lightweight configurator state; no boilerplate
Jewellery Preview	SVG illustrations (keyed to config state)	Each option change updates SVG props in real time
AR Try-On	8th Wall or Snap Camera Kit (WebAR)	Ring/earring try-on. Phase 2 feature.
Payments	Stripe Checkout	Plus BNPL: Atome / Pace / GrabPay (SEA market)
CRM / Email	Klaviyo	Abandoned configurator flows; saved design re-engagement
Analytics	PostHog	Funnel tracking — drop-off rate per configurator step
Search / Filtering	Algolia (future)	When product catalogue scales
Hosting	Vercel	Seamless Next.js deployment; edge functions
Image Optimisation	next/image + Cloudinary	Auto-format and responsive sizing
Design System	Storybook	Component library for all UI elements

SEO Considerations

- Each jewellery category + occasion combination should generate a unique, indexable URL e.g. /design/ring/engagement.
- Pre-rendered landing pages for high-intent search terms: 'lab-harvested diamond Singapore', 'custom stone jewellery', 'lab diamond ring'.
- Structured data (JSON-LD) for all product pages: Product, Review, FAQPage schemas.
- Open Graph and Twitter Card meta for all shareable design URLs.
- Core Web Vitals target: LCP < 2.5s, CLS < 0.1, FID < 100ms.

I. Copy Direction & Brand Voice

Voice Principles

WOYKE speaks the way it makes: with precision, warmth, and quiet certainty. The brand character is the voice guide — *fun, precise, confident in simplicity, but also arresting in magnificent*. Every line of copy should be able to sit next to that statement without contradiction.

- Fun means approachable — never stiff, never reverent about itself.
- Precise means every word earns its place. No filler. No fluff.
- Confident in simplicity — short sentences. Present tense. Active voice.
- Arresting when the moment calls for it — don't be timid about going fully there.
- Celebrate every step — each choice the customer makes is theirs alone.
- Sustainability woven in naturally — never preachy, never a lecture.
- Occasion-aware: 'For her. For him. For you. For the moment.'
- Plain English always. Tooltips for every technical term.
- Never use: sophisticated, luxury, bespoke, artisanal, curated, elevate, effortless, DTC, mass-market.
- The tagline *i am, we are.* is always lowercase. Always. This is intentional.

The Brand Story in Three Beats

Use this structure across all brand communications — website, packaging, social, email:

I AM	WE ARE	GROWN
You are the designer. This piece begins with you — your occasion, your stone, your metal, your story. No catalogue. No compromise. Nothing exactly like it exists.	A piece worn is never worn alone. It sits between people. It travels forward in time. What begins as one person knowing themselves becomes part of a larger story — shared, given, carried on.	Every stone WOYKE sets is lab-harvested. The same fire. The same carbon. A different story — one that costs the earth nothing. Sustainability is not our selling point. It is our standard.

Sustainability Copy

Woven throughout the site — not confined to the Sustainability page. Natural, never preachy.

- “This diamond was grown in a lab, using renewable energy, at a fraction of the environmental cost of mining.”
- “Every WOYKE stone is lab-harvested — identical to a mined stone in every measurable way, except its origin.”
- “No mine. No displacement. No conflict. Just a diamond, grown with intention.”
- “Our packaging is plastic-free and recyclable. Our shipping is carbon-neutral.”
- “Lab-harvested is not a compromise. It is a choice. One that costs the earth nothing.”
- “The same carbon. The same fire. A different story.”

Micro-copy for Configurator Steps

UI Moment	Copy
Opening / welcome	<i>“This one starts with you.”</i>
Step progress (e.g. Step 3 of 11)	<i>“Step 3 of 11 · You're making something no one else will own.”</i>

After selecting occasion	<i>"A beautiful reason. Let's make it count."</i>
After selecting a stone	<i>"That cut catches light like nothing else. Good choice."</i>
After selecting metal	<i>"Rose gold. Warm, romantic, entirely right."</i>
Reaching the live preview	<i>"Here it is. Almost yours."</i>
Engraving step	<i>"Say something only you would say."</i>
Add to cart	<i>"This one's yours. We'll start making it."</i>
Order confirmed	<i>"We have it. Give us 3–4 weeks. Worth it, we promise."</i>
Gift toggle on	<i>"Gift mode on. The price stays between us."</i>
Share design CTA	<i>"Show them who you are."</i>
Surprise Me result	<i>"Something told us you'd like this."</i>
Empty saved designs	<i>"Nothing here yet. That's about to change."</i>
Sustainability tooltip	<i>"Grown, not mined. Same diamond. Better story."</i>
Occasion countdown	<i>"Need it by [date]? Order by [date]. We'll make it happen."</i>

This document is the complete UX and customisation specification for WOYKE's lab-harvested stone jewellery design tool. All steps, options, copy, and technical guidance have been consolidated for the web design and development team. Questions should be directed to the brand team. Tagline: i am, we are. Version 1.0 — 2026.
